

Software Engineering Intern | Bangalore

Flam is building the next generation of AI-native content formats that transform passive customer touchpoints into human-like visual interactions. We power enterprises to create immersive, interactive experiences across marketing, communication, and commerce using cutting-edge generative AI.

Core Mission : We believe the most powerful interactions aren't transactional—they're creative, tactile, and alive. Flam is enabling businesses to go "beyond videos" with intelligent, interactive visual content.

About the Role

We're looking for a passionate and motivated Software Engineering Intern to join our engineering team. You'll work closely with experienced developers to design, build, and test features that impact real users. This is a hands-on internship where you'll gain exposure to the full software development lifecycle—from ideation to deployment.

Key Responsibilities :

- Collaborate with the engineering team to design, develop, and test software solutions.
- Write clean, efficient, and well-documented code.
- Debug and troubleshoot application issues across different environments.
- Participate in code reviews and contribute to best practices in software development.
- Assist in integrating APIs, improving performance, and maintaining existing systems.
- Research emerging technologies and propose innovative solutions.

What We're Looking For:

- Pursuing a Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- Strong understanding of programming fundamentals and object-oriented design.
- Experience with at least one modern programming language (e.g., Python, Java, JavaScript, C++, or Go).
- Familiarity with web development frameworks, databases, or cloud technologies is a plus.
- Strong problem-solving and analytical skills.
- Eagerness to learn and contribute in a fast-paced, collaborative environment.

Bonus Points For :

- Prior internship or project experience in software development.
- Exposure to Git/GitHub, APIs, or DevOps tools.
- Understanding of Agile development processes.
